

To whom it may concern:

XM Radio informed me this morning about the desire of the National Association of Broadcasters to dictate what information I am allowed to pay for and receive on my XM Radio.

I understand that they want to stop XM Radio from broadcasting the local weather and traffic reports. This is part of the reason I purchased the service in the first place. I live in Roanoke, VA, but I travel during my job frequently to the DC area.

Please consider the value of this service to the subscribers and reject NAB's petition 04-160. After all, we, the subscribers are paying for this service.

Respectfully,

Steve Minnix
Roanoke, VA
